CAREER OBJECTIVE

DevOps Engineer Fresher with hands-on experience in Linux, Git, Docker, Jenkins, Kubernetes, and CI/CD automation. Built and deployed containerized applications using Jenkins pipelines and Kubernetes. Seeking an entry-level DevOps, Cloud, or Site Reliability Engineer (SRE) role.

TECHNICAL SKILLS

- Operating System: Linux (commands, permissions, process management, shell execution)
- DevOps Tools: Docker, Kubernetes, Jenkins, Git, GitHub
- Cloud: AWS (EC2, S3 – basics)
- Scripting : Shell Scripting (basic automation)
- Programming: Python (Flask basics)

PROJECTS

1. Flask CI/CD Pipeline using Jenkins & Docker

- Built CI/CD pipeline using Jenkins and GitHub
- Automated Docker image build and deployment
- Created Jenkinsfile for pipeline automation
- Deployed Flask application using Docker
- Pipeline flow: **Developer → GitHub → Jenkins → Docker → Deployment**

2. Kubernetes Deployment of Flask Application

- Containerized Flask application using Docker
- Deployed application on Kubernetes using Minikube
- Created Deployment and Service YAML files
- Managed pods and services using kubectl
- Exposed application using Minikube service

3. CI/CD Kubernetes Deployment Project

- Built end-to-end CI/CD pipeline.
- Automated Docker image build and push to Docker Hub.
- Deployed Flask application on Kubernetes.
- Integrated GitHub, Jenkins, Docker and Kubernetes.

4. Prometheus & Grafana Monitoring Project

- Configured Prometheus and Grafana monitoring stack.
- Collected application and infrastructure metrics.
- Created dashboards for performance monitoring.
- Monitored system health and resource utilization.

CERTIFICATIONS

- DevOps Engineer Training – **StarAgile**
- AWS Fundamentals / AWS Expert Training
- Docker Essentials Certification
- Kubernetes Certification (Scalable Applications)

EDUCATION

- Bachelor of Engineering (B.E.)
SEA College of Engineering
Year: 2024
- Pre-University Course (PUC)
Shree Venkateshwara PU College
Score: 75%

INTERNSHIP EXPERIENCE

DevOps Internship Trainee

- Worked with Linux, Docker, Jenkins and Kubernetes.
- Built CI/CD pipelines for application deployment.
- Created Docker images and managed containers.
- Deployed applications on Kubernetes using YAML manifests.
- Practiced Git-based version control workflows.
